problem fixed

EZPath® Retrofit Device

instant compliance
FOR OVERFILLED SLEEVES
Rapid Remediation

The NEW EZ-Path® Retrofit Device is engineered for quick and easy installation. It instantly transforms overfilled sleeves to compliance in seconds.

The two-piece split device simply wraps around the cable bundle and extended sleeve. It can even accommodate an existing conduit bushing.

Once the device is secured, existing firestop materials can be left in place and the cable sleeve can remain active. Cables can be added up to 100% visual fill or removed down to 50% visual fill while still maintaining ongoing compliance.

Don’t stress out about deficient overfilled sleeves!*

- No deficiencies
- No fines
- No headaches
- No hassles

Restores compliance instantly!

*For use with sleeves from 50% to 100% visual fill.
