Level 2
Firestop Instructional Training Workshop

2020 Dates

Click on desired date to register

June 24th – 25th | Somerville, NJ
September 23rd – 24th | Somerville, NJ
October 21st – 22nd | Somerville, NJ
December 1st – 2nd | Somerville, NJ
Purpose Of Training
Firestopping is a topic of great interest to contractors and facility engineering professionals, particularly since fire and smoke barriers are constantly being breached with new services or cable changes for voice and data systems in modern facilities. With proper planning and training, the firestopping process is greatly simplified, costs are reduced, and facility owners are provided with code-compliant firestop systems, thereby enhancing life safety and property protection.

This comprehensive, competency-based course is designed to educate and train participants in the fundamentals needed to become a resident firestop specialist. The goal is to equip the participant with the knowledge and tools needed to return home and serve as a resident expert in confirming whether or not firestop installations are code compliant.

Continuing Education
This Level 2 class is registered with the (AIA) American Institute of Architects for 16 LU/HSW. The Learning Units address issues concerning Health, Safety, or Welfare of the Public. This course is also recognized for 12 CECs with BICSI.

Who Should Attend?
People who will install, inspect, specify, train or supervise firestop installations. These include contractors, AHJs, architects, engineers, maintenance managers, IS managers, CE managers, IT directors, infectious control managers, life-safety officers, loss reduction specialists and other interested parties.

Vendor-Neutral Training
Unlike some training experiences, this is not a sales training - all training is unbiased and educational. We do not engage in the sales or promotion of our own, or other manufacturer’s products, so you know your money is well spent!

Train-the-Trainer
Those who attend this seminar and receive a passing score of 80% on their exam can become a certified FIT Trainer. They will receive the Trainer’s Curriculum Kit link after successful completion of the course and exam. Being a trainer allows you to train others in your organization or related field to receive a FIT Level 1 certification. You will train these individuals based on the curriculum in the Level 1 Trainer’s Curriculum Kit.

Meals
A buffet lunch will be provided on both days. An optional group dinner will be provided following the Day 1 session.

Course Overview & Registration
Classroom Session – Day 1
8:00 am - 8:30 am - Registration
8:30 am - 11:00 am - Class
11:00 am - 12:00 pm - Fire Test
